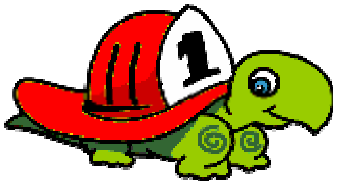
My Home Fire Escape Plan

Hey kids, I am Marty, and with the space below you can create you very own fire escape plan. You might want to ask your parents to help you draw the layout of your house. Make sure you show doors, windows, 2 escape routes and rally point outside where every one should meet. When you are done, be sure to practice your escape routes every few months!



Remember kids, if your house is on fire, don't grab your toys or your pets. When everyone is outside, call 9-1-1 from a cell phone or a neighbor's house.
